

CLEANING ROBOT **C30** *PRODUCT INTRODUCTION*

PAIN POINTS IN THE CURRENT CLEANING INDUSTRY

AGING WORKFORCE

Young People Is Reluctant To Cleaning Jobs

Recruiting difficulties for simple and repetitive tasks have become a common phenomenon, and the shortage of labor in the cleaning industry is particularly evident. Currently, the older generation of cleaners is gradually aging, while the younger generation's interest in pursuing cleaning work is diminishing. However, cleaning robots will never face such problems.

COSTLY LABOR EXPENSES

The Cost of Human Labor is High

In addition to monthly fixed wages, human employees also incur costs for cleaning tools, employee training, employee management, scheduling, and other hidden costs, making the overall cost high. In comparison, cleaning robots are a one-time investment and incur no training or management.

HEALTH AND SAFETY RISKS

Exposed To Health And Safety Risks

Cleaning workers often engage in repetitive physical labor, such as scrubbing, sweeping, and lifting heavy objects. Prolonged engagement in these activities can lead to muscle strain, musculoskeletal issues, or occupational diseases such as herniated discs or arthritis.

CLEANING QUALITY

Inconsistency In Cleaning Quality

Human cleaning cannot achieve consistent cleaning results, while cleaning robots equipped with multiple sensor fusion technologies can accurately detect and clean dirt and impurities. Cleaning robots can achieve higher cleaning quality and consistency without the need for human intervention.

OVERVIEW OF CLEANING ROBOT C30

600 m²
Per Hour

≤70 dB
Working Noise

3.5 L
Large Dust Bag

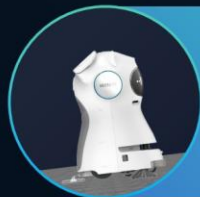

2500 m²
Per Task

19000 Pa
Vacuum Degree

0.8 m/s
Moving Speed

8 °
Climbing Angle

CLEANING ROBOT
C30

35kg
With Battery

75cm

49cm

61cm

OVERVIEW OF CLEANING ROBOT C30

C30 MAIN PARAMETERS

C30

CLEANING ROBOT

C30 Product Main Parameters

Robot Size	490*610*750 mm (With Dust Push) 490*520*750 mm (Without Dust Push) 490*646*990 mm (Handle Raised)	Net Weight	35 kg (With Battery) 30 kg (Without Battery)
Cleaning Area	2500 m ² /Task (Under Full Charge)	Moving Speed	0.8 m/s
Cleaning Efficiency	600 m ² /h	Battery Life	3-6 Hours (Sweeping/Vacuuming Mode) 10 Hours (Dust-pushing Mode)
Charging Mode	Automatic charging with the bundled charging pile	Charging Time	5-6 Hours
Maximum Vacuum Degree	19,000 Pa	Noise	≤70 dB
Maximum Cleaning Width	610 mm (Double Side Brush + Rolling Brush)	Maximum Slope Angle	≤ 8°
Dust Collection Ability	3.5 L/Bag	Carpet Cleaning Ability	10 mm

CUTE AND FRIENDLY DESIGN

AN ADORABLE AND CAPABLE CLEANING ASSISTANT
